PADI Enriched Air “Nitrox”

The most popular PADI specialty course. Scuba diving with enriched air nitrox gives you more no decompression time, especially on repetitive scuba dives.

Enriched Air, also known as “nitrox”, is a form of breathing gas that allows divers to extend bottom time and reduce nitrogen loading. It is PADI's most popular specialty course. PADI Enriched Air Diver class can be completed in as little as an afternoon. After completing your academic portion, you'll apply the knowledge you've learned by practicing procedures for obtaining and analyzing enriched air with a JS Dive Training Center Instructor.

This certification counts towards the PADI Master Scuba Diver rating.

Prerequisites & Requirements

Course Prerequisites

PADI Open Water Diver (or qualifying certification)

Age Requirement
